## Technical Projects

---

- **Git in VS Code** - Authored documentation that explains the usage of Git version control in VS Code in 13 steps with images for ease of use.
- **Adopt Differently** - Created a project to help people find cats that are up for adoption. Where I was in charge of frontend development utilizing React.js
- **Code Differently Repo** - An open-source repository that holds all the coursework completed during my time with code differently. I had opened over 10 pull requests, and over 8,000 lines were committed.
